

### The Angel Tuners™ Set of 3 - C 4096 Hz, 4160 Hz, 4225 Hz

Based on the ninth octave of the overtone series, the Angel Tuners open the passageway to angelic kingdoms. By vibrating your cranial bones, the Angel Tuner opens the gateway for spiritual insights and experiences. This tuner enhances your connection to universal energy for manifesting inspiration and a meditative state, as well as connections with higher powers, visions, and creative expression.

#### Benefits:

- Enhances connection to universal energy
- Spiritual insights and experiences
- The manifestation of inspiration and a meditative state
- Connect with higher powers and creative expression

The Angel Tuners are based on the ninth octave of the overtone series. In the overtone series, a fundamental tone creates a second tone and the second tone creates a third tone, etc. These tones ascend in pitch. This rising in pitch of the overtone series represents the archetypal images of Jacob's Ladder and the stairway to heaven. Alexander Scriabin, a Russian composer, believed ninth octave overtones would bring forth a new era and unite Heaven and Earth. His last composition "Mysterium" was to be played in India using bells hung from clouds sounding these overtones. The Crystal Tuner is one of three tuners in the Angel Tuner set.

#### Instructions:

All three Angel Tuners can be used in many creative ways. Tap any two together and meditate upon the sound or hold several Angel Tuners between your fingers and tap them simultaneously to create an Angelic concert. The sound will be delicate, and high in pitch.

The Angel Tuners can also be used with crystals to create group meditations. With one person laying on a bodywork table or floor as many as five people can surround him or her with their Angel Tuners and crystals. For example, one person can stand at the head, one at each shoulder, and one at each hip creating a five-star pattern. Then you can gently tap the forks and move the crystals along different diagonal star patterns.

After meditation or massage, gently tap the Angel Tuners. You do not have to hold them directly in your ears. Tap them gently three inches to several feet off the cranium and move them around. They can be held in specific areas of sutural restrictions, internal bone rotation, or energy conflict. The pulsating beats between the tuning forks will be apparent to the listener's ears.

Most importantly, allow your inner mind to listen to the sound and create new ways of using the Angel Tuners.

The Angel tuning forks have high, fine frequencies. At dawn or dusk is the time to immerse yourself in the Otherworld. I go out into nature and follow the trail of nature beings. They appear in remote clearings or at the edge of the forest or nearby a hawthorne. I gently strike the Angel Tuners together and immediately feel a movement in the corners of my eyes. The high vibrations of the tuning forks attract subtle energies and I can see the nature beings flitting past in the corners of my eyes. I hold the two Tuning forks in one hand and tap them with the C 4096 Hz in the other hand. The subtle sound expands my peripheral vision, all my senses are heightened and I perceive things that were previously hidden from me.
